ABOUT ME

I'm a passionate and adaptable **Full Stack Developer** with over **4 years** of **experience** building modern **web applications**. I started my journey working **independently** on **freelance projects** and co-founding a **startup**, which strengthened my problem-solving and product-thinking skills. While I'm **proficient** across the **full stack**, I particularly enjoy **frontend** development — crafting intuitive, **visually** engaging **interfaces** that form the first point of **interaction** with **users**.

EXPERIENCE

FULL STACK DEVELOPER / INVIBE JULY 2025 – PRESNET

PHP · Laravel · Vue.js · JavaScript · HTML · CSS(SCSS) · Git · SQL(MySQL)

- Develop and maintain scalable web applications across multiple domains, including e-commerce platforms, CRM systems, and admin dashboards.
- Implement RESTful APIs and integrate front-end components with Laravel back-end services.
- Build responsive and user-friendly interfaces using Vue.js and modern JavaScript practices.
- Collaborate with designers and backend teams to ensure seamless user experience and clean architecture.
- Write efficient, maintainable, and secure code following best practices in performance and version control.
- Optimize database queries and manage MySQL schemas for improved system performance.

FULL STACK DEVELOPER / EVERLUTION SOFTWARE SEPTEMBER 2023 – MARCH 2025 / 1.7 YEARS

React.js · GraphQL · Node.js · TypeScript · Prisma ORM · MySQL · SCRUM

- Started as a **Frontend Developer** and gradually transitioned into **full-stack development**, contributing across the entire application stack.
- Built and maintained modern, **responsive** web applications using **React** and **TypeScript**, with a focus on performance, accessibility, and **user experience**.
- Developed backend functionality using **Node.js**, **GraphQL**, and **Prisma ORM**, ensuring efficient data handling and seamless API integration.
- Participated in **code reviews** and enforced best practices, contributing to a clean, scalable, and maintainable codebase.
- Worked closely with **designers**, **product owners**, and **backend engineers** to align development efforts with business goals and user needs.
- Proactively explored new tools and development strategies to enhance **team workflows** and overall project quality.

EDUCATION & LANGUAGES

Bachelor's Degree in Computer Science / Technical University of Kosice, Slovakia

September 2022 - June 2025

Skills gained: C, Java, Python, OOP, Algorithms and Data Structures, Operating Systems, Computer Networks, Databases, Computer System Security, Game Development, UX/UI.

Languages: English (B2) | Slovak (C1) | German (A1) | Ukrainian (Native)
